Re: FAR Case 2001-014

Dear Ms Duarte.

As the President of PollockSummit Electric and a part of Integrated Electrical Services, I am interested in the federal government receiving fair value for goods and services in its contracts. I was pleased to learn about the policy initiatives proposed in the Federal Acquisition Regulations April 3, 2001 edition of the Federal Register.

These actions will end the acquisitions policy initiated in FAR Case 1999-010. This policy has been unfair in that small businesses have been denied federal contracts due to violations of complicated federal laws. Further, resolved allegations have still prohibited companies from being awarded federal contracts.

I believe it is imperative that reforms be made to the acquisition policy to facilitate opportunities for small businesses and independent contractors to obtain contracts with the federal government. Your attention to this matter is greatly appreciated.

Sincerely,

Randolph M. Wright
President
